EXPERIENCES

- Designing modern, user-friendly, and responsive web interfaces using HTML5, CSS3, JavaScript, and TypeScript.
- Building responsive and mobile-friendly layouts using frameworks such as Bootstrap, Tailwind CSS and modern CSS techniques (Flexbox, Grid).
- Developing interactive front-end applications using Vue.js React.js.
- Integrating RESTful APIs with front-end applications for data fetching, authentication, CRUD operations, and real-time updates.
- Understanding API communication methods including Axios, Fetch API, JSON handling.
- Managing application state and component architecture in Vue.js projects.
- Experience with version control systems using Git and platforms like bitbucket for collaboration and source code management.

COVER LETTER

Dear Hiring Manager,

I am writing to apply for the Front-End Developer position at your company. I have experience in designing modern, user-friendly, and responsive web interfaces using HTML5, CSS3, JavaScript, and TypeScript.

I am skilled in building responsive and mobile-friendly websites using Bootstrap, Tailwind CSS, Flexbox, and CSS Grid. I also have experience developing interactive web applications using React.js and Vue.js.

In addition, I understand how to integrate RESTful APIs with front-end applications for authentication, CRUD operations, and data handling using Axios, Fetch API, and JSON. I am familiar with component architecture and state management in Vue.js projects.

I also have experience using Git and Bitbucket for version control and team collaboration. I am passionate about learning new technologies and improving my development skills.

I would welcome the opportunity to contribute my skills and grow with your team. Thank you for considering my application. I look forward to hearing from you.

Sincerely

Chheut Chhordin
